

How To Create Shoppable Video with DailyMotion & SimuStream

SimuStream.com | Support@SimuStream.com

How To Create Shoppable Video with DailyMotion & SimuStream

1. You'll want to start by connecting your eCommerce platform to SimuStream.
2. Sign into your pre-existing DailyMotion & SimuStream accounts.
3. To integrate your video content with DailyMotion you'll want to use the link
4. share feature rather than channel connection like YouTube.
5. Ensure that your video is public instead of private. If you're unable to make your video public you may need to switch to a DailyMotion partner account at no cost to you this will enable you to use additional DailyMotion features such as making your videos public adding tags & more.

How To Create Shoppable Video with DailyMotion & SimuStream

6. Copy the video link from DailyMotion head back to SimuStream & click streams.
7. Next, click active, then click create new stream & paste your video link. Click load player.
8. Once you've loaded your video it's time to add in our products we'll select the products we'd like to add and then click on add.
9. You can easily customize when your products time in or out of your video and add multiple time in & out for one product within a single video.
10. Once you've timed your products into your video click publish and share to view your fully completed shoppable video.
