How to Create Your eCommerce Stream

1. Start by connecting your video platform & eCommerce platform to
2. SimuStream. To learn how to connect these platforms, check out our YouTube video for your platform of choice.
3. Before getting started, ensure your products show up within SimuStream.
4. Start by clicking Streams, then click active. Click create new stream, then choose a video from your previously connected video platform or via link.
5. Make sure to name your form & add a description, then click choose products. Select the products you'd like to feature in your stream.
6. Next, choose when your products will time in & out of your video.

How to Create Your eCommerce Stream

10. We recommend you time in as early as 1 second & time out close to or at the end of your video. You can also time a single product in & out multiple times within your video.
11. Click publish & share to publish your video & receive the link for your
12. interactive video.

    You can now embed your completed video on your website, use it across social media, & more.
